

# Asset Manager *Lite*™

## Remote Management for ATM Operations

A remote distribution and management solution designed to deliver performance improvements and cost-savings to your multi-vendor ATM portfolio

### ASSET MANAGER *LITE*™ APPLICATION

Everything You Need For Remote Device Management in a Single Solution

We recognize that developing new revenue opportunities in the ATM channel is an urgent need for many financial institutions. However, operating your ATM portfolio efficiently and economically is equally important, and with our comprehensive remote management solution, Asset Manager *Lite*™ (AML), TEKchand proves once again it is your single source for value-added ATM solutions. AML understands the nuances of the ATM operating environment and the complex ATM vendor specific requirements. Most importantly, AML helps you boost the efficiency of your ATM Operations with a complete toolset for Asset Inventory Management, Software Distribution, Remote Device and Desktop Control.

### EXPAND YOUR RETAIL ATM DISTRIBUTION WITHOUT HESITATION

AML is especially valuable for financial institutions that are expanding their presence in the retail channel, which is a different operational challenge than branch-based ATM placements. With so many different ATM manufacturer options for off-premise, the flexibility to choose affordable hardware and reduce on-site maintenance costs without loss of control or continuity requires an agile yet robust remote management tool. AML delivers a feature rich application in a light weight design that simplifies off-premise deployment management.

#### Key Features

- ✓ **Capture, build, store and easily access ATM asset information** on hardware configurations, O/S, application versions, and patch history.
- ✓ **Securely deploy large-scale O/S and Application level patches** using TEKchand's state of the art distribution engine.
- ✓ **Remotely reboot ATMs** in real-time using our system reboot or vendor specific safe reboots
- ✓ **Setup up event based or regularly scheduled remote file upload** jobs for Check Images, Error Logs, and more.
- ✓ **Remote Desktop capabilities for secure login and "virtual view and control"** for administration and management of any windows device.

For more information about **Asset Manager *Lite*** or the **ATMLive Manager** Platform, contact **TEKchand LLC**, at [sales@tekchand.com](mailto:sales@tekchand.com) or call 1-888-512-0462

#### Additional Features

- ▶ **Asset Manager *Lite*™ is certified on Windows 7® and currently in production on the following devices: NCR AANDC™, NCR Edge™, Diebold Agilis™, and Hyosung MoneyPass II™.**
- ▶ **File Transfer Optimization** with such concepts as "throttling" "chunking" and "payload-splitting" for network bandwidth management and "traffic shaping."
- ▶ **Control and Audit** the ATM bound activities from a Web User Interface with ability to Halt, Retry, and Revert remote jobs.
- ▶ **Use the Visual Alerts captured from Event and Error Logs** on the ATM to take proactive steps on maintaining your hardware & software infrastructure and troubleshoot problems.
- ▶ **Export data into variety of formats** such as XLS and PDF.
- ▶ **ALL TEKchand applications are designed for PCI Compliance**
